Established: 1988

## Business Description

We offer terrific services in producing quality machined parts. We cut acrylic, acrylic mirror, Plexiglass, Lucite both cast & extruded plastics as well as styrene, styrene mirror & polypropylene.

With our production panel saw and our two Powermatic table saws, we cut custom orders to size. We provide various edge finishing styles, drill and countersink, and offer either a buffed or flame polished finish to make that edge shine.

We own and operate two laser cutting systems with great high production capabilities. Using our Cad/Cam software, we can cut the most intricate parts with amazing results.

Parts nesting software allows us to utilize virtually every inch of material to minimize waste. We are very eco-friendly and recycle all of our waste.

## Detailed Information
